NOTES ON INSTALLATION:

THE SCHEMATIC DRAWING ABOVE REPRESENTS THE MOST COMMON WIRING CONFIGURATION USED WITH THE TC300 FET PREAMP/TONE CONTROLLER. SINCE OUTPUT VOLTAGES VARY GREATLY BETWEEN GUITAR PICKUPS AS WELL AS WIRING CONFIGURATIONS FOR THOSE PICKUPS CARE SHOULD BE EXERCISED WHEN WIRING OTHER THAN PASSIVE TYPE PICKUPS. WHEN TRYING ANY NEW INSTALLATION TRY FIRST SIMPLY REMOVING THE GUITAR'S ORIGINAL OUTPUT JACK AND WIRING IN THE CIRCUIT ABOVE.
